

Backtracking Algorithm Efficiency Improvement

Fix Panels 32,4°

1 Axis Tracker

1 Axis Tracker + Back tracking

Latitude 38° N

Dimensions: Panel Length 50m - Panel Width 2m

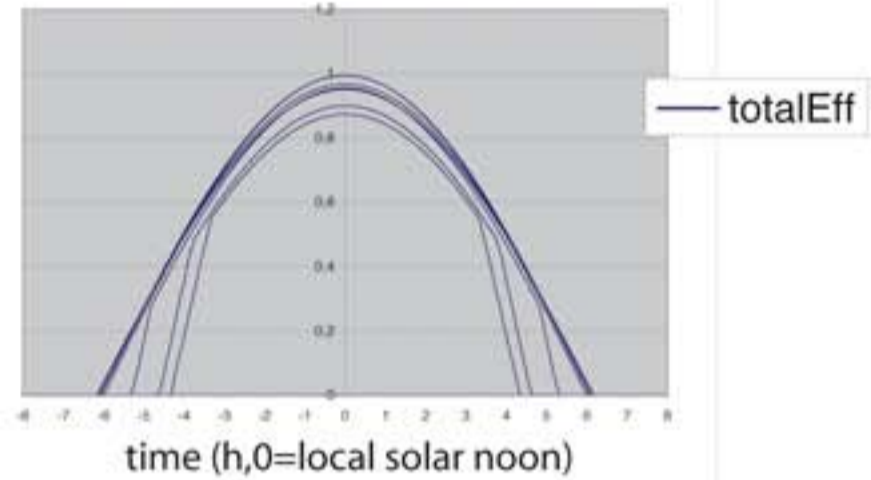

Separation 5m

(Tilt angle for fixed panels: 32.4°)

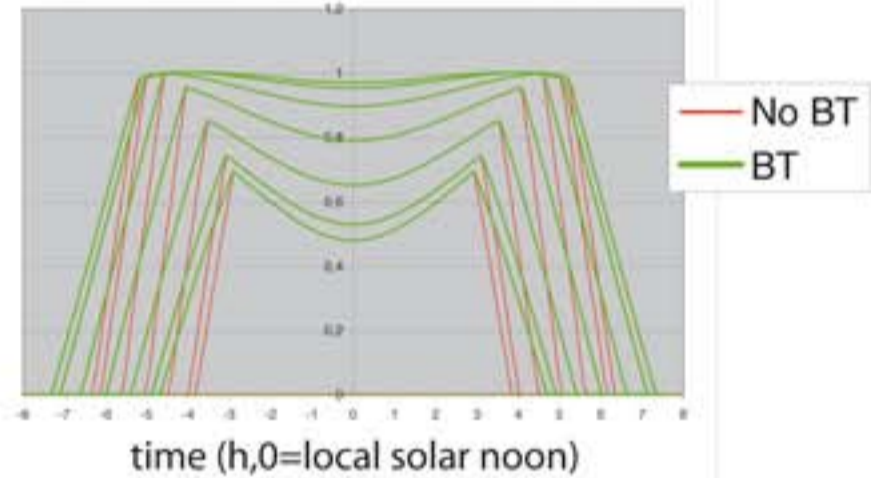

(*) Efficiency is computed considering the incidence angle and the shadows among panels. It is a pure geometric calculation.

Backtracking Algorithm Efficiency 5 meter gap

Fixed panels (EW), One Year Period
